Results

In Q3, the loss for the quarter totalled NOK -8.3m against a loss of NOK -65.1m in Q3 2018. The weak result is driven by a weak return on investments.

The arbitration aftermath has in Q3 approx. a NOK 60m positive effect on the profit before tax.

The net combined ratio was 91.6%, 4.1 percentage points lower than the 95.7% reported in Q3 2018.

The net combined ratio by country was:

Net combined ratio	Q3 2019	Q3 2018
Norway excl. COI	101,7 %	81,1 %
Sweden	95,8 %	95,6 %
Denmark	89,8 %	95,6 %
UK	44,0 %	188,6 %
Finland	118,4 %	153,9 %
Total	91,6 %	95,7 %

In Q3 the company had run-off gains of 1.9% including the arbitration aftermath against 7.8% run-off gains in Q3-18.

The claims ratio for own account decreased from 88.9% in Q3 2018 to 84.1 % in Q3 2019. Excluding the arbitration aftermath, the net claims ratio was 89.5%. The weak claims ratio is driven by run-off-losses within the personal lines of business in Norway and Denmark (approx. NOK 47m) and a higher large loss ratio than normalized. Sweden was in Q3 hit by a very large property claim (approx. MNOK 40). The poor claims result in Finland is driven by a case reserve clean-up.

The expense ratio for own account amounted to 7.5%, up from 6.7 % in Q3 2018. The increase is due to significant reductions in reinsurance commissions due to change in reinsurance structure (from Surplus to Risk XL on property). Growth in the UK drives also broker commissions upwards.

The cost level is supported by a low expected bonus level for 2019. The underlying cost ratio is approx. 1 percentage point higher.

In the first three quarters, the loss for the period totalled NOK -42.1m against a loss of NOK -13.7m in the same period last year. The net combined ratio was 101.1%, compared to 95.9% in 2018.

The net combined ratio for the first three quarters by country was:

Net combined ratio	Q1-Q3 19	Q1-Q3 18
Norway excl. COI	98,3 %	96,0 %
Sweden	97,9 %	84,4 %
Denmark	104,6 %	96,4 %
UK	101,3 %	123,8 %
Finland	122,3 %	137,4 %
Total	101,1 %	95,9 %

YTD the company had run-off losses of 0.4%. Exclusive the Grenfell Tower arbitration the company had run-off gains of 0.1%.

The gross expense ratio was 7.8% down from 8.4%, whilst the net expense ratio was 7.5%, up from 2.7%. The low net cost ratio in 2018 comes from a high level of reinsurance commissions.

Investment return

Net investment portfolio amounted to a total of NOK 11.081m at 30 September 2019, up 8.8% compared to the portfolio end of Q3 2018.

Investment activities yielded a total negative return of NOK -41.4m, or -0.4% compared to a return of NOK 46.4m or 0.5% in Q3 2018. The return on the fixed income portfolio totalled NOK 163.7m or 1.7% against NOK 118.9m or 1.4% YTD 2018.

The company's equity amounted to NOK 1,978m at the end of the quarter. End of Q3, the solvency capital requirement (SCR) ratio using the standard formula was 164% (unchanged from end of Q2 2019), which is within the company's risk appetite. The company's long term objective is to maintain a SCR-ratio (calculated according to the Solvency II regulations) above 150 %.

Protector has a BBB+ rating from A.M. Best.

Prospects

The profitability in the Nordics remains under pressure and price increases and other profitability measures will continue. The underlying technical result is expected to be improved. However a lower growth rate must be expected going forward, due to the significant profitability actions in the Nordics.

Discontinued operations

Protector decided in 2018 to exit the COI market due to the product's recent years weak technical performance, and due to the significant uncertainty related to the product's future premium development and profitability. After the decision to exit the COI market, COI is defined as "discontinued operations" in the accounts. Net profit and assets and liabilities associated with COI are presented on separated lines as discontinued operations.

Protector has in July 2019 entered into a 50% quota share agreement (reinsurance) for the entire COI portfolio. The quota share agreement includes the historical portfolio as well as all new business written until the policy writing cease.

The fair value of listed investments is based on the current sales price. Financial instruments measured at fair value are valued on a daily basis. Directly observable prices in the market are used as far as possible. The valuations for the different types of financial instruments are based on recognised methods and models.

Level 1: Financial instruments valued on the basis of quoted prices for identical assets in active markets

This category encompasses listed equities that over the previous three months have experienced average daily trading equivalent to approximately NOK 20 million or more. Based on this, the equities are regarded as sufficiently liquid to be included at this level. Bonds, certificates or equivalent instruments issued by national governments are generally classified as level 1.

Level 2: Financial instruments valued on the basis of observable market information not covered by level 1

This category encompasses financial instruments that are valued on the basis of market information that can be directly observable or indirectly observable. Market information that is indirectly observable means that the prices can be derived from observable related markets. Level 2 includes shares or equivalent equity instruments for which market prices are available, but where the volume of transactions is too limited to fulfil the criteria in level 1. Shares in this level will normally have been traded during the last month. Bonds and equivalent instruments are generally classified in this level. Foreign exchange derivatives are classified as level 2. Fund investments are generally classified as level 2.

Level 3: Financial instruments valued on the basis of information that is not observable in accordance with level 2

The instrument is included in level 3 if one or more essential data are not based on observable market data.
